

PROTECTION AGAINST THEFT

- **STOLEN PRODUCTS FLAGGING**
- **IMPOSSIBLE TO RESELL**
- **REAL-TIME NOTIFICATION**
- **DETERRENCE FACTOR**

Validactor enabled products can be flagged as stolen with few mouse clicks.

Stolen flagged products cannot be easily sold on legal market, unless they are relabeled, which in most cases is not possible at all.

If a stolen product is scanned, the manufacturer receives an instant notification with product geo location data.

Validactor is a strong deterrent against theft.
